Investment Objective
The Fund seeks high appreciation on an annual basis consistent with a high tolerance for risk.

Fund Attributes
- Tactical sector-rotation equity exposure that may adjust among sectors based on the strategy's methodology.
- May use leverage in certain conditions.
- May vary equity exposure tactically and increase cash equivalents during perceived higher-risk periods.

Reasons to Invest
- Evaluates sector trends and may reallocate toward sectors identified as stronger.
- May reduce or avoid exposure identified as weaker to manage risk.
- May increase cash equivalents during perceived equity market declines.

Fund Performance
As of March 31, 2026

Inception date: 3/4/2021	QTR	YTD	1 Year	3 Year	5 Year	Since Inception
QTSSX	-4.06%	-4.06%	12.68%	9.47%	-4.91%	-4.73%
S&P 500 TR Index	-4.33%	-4.33%	12.06%	18.32%	18.32%	13.07%

Returns for periods greater than one year are annualized.

The performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost.

Current performance may be lower or higher than the performance data quoted and assumes the reinvestment of any dividend or capital gains distributions. To obtain performance data current to the most recent month-end please call toll free 888.572.8868 or access www.quantifiedfunds.com.

The S&P 500 TR Index is a capitalization-weighted index of 500 stocks representing all major domestic industry groups. The S&P 500 TR assumes reinvestment of dividends and capital gains.

It is not possible to directly invest in any index.

Growth of a $10,000 Investment
The Fund has returned an average of 0.03% annually since inception through 3/31/2026

Annual Returns

	2022	2023	2024	2025

Share Class	Expense Ratio	Minimum Initial Investment
(INV) QTSSX	1.72%	$10,000

An investor should carefully consider the investment objectives, risks, charges, and expenses of the Quantified Funds before investing. This and other information can be found in the Funds' prospectus and summary prospectus, which can be obtained by calling 1-855-650-7453. The prospectus should be read carefully prior to investing in the Quantified Funds.

High portfolio turnover may result in higher transaction costs and higher taxes when Fund shares are held in a taxable (non-qualified) account. Such costs are not reflected in annual Fund operating expenses and may affect the Fund's performance.

There is no guarantee the Fund will achieve its investment objective. There is no guarantee that any investment strategy will generate a profit or prevent a loss.

An investment in the Fund entails risk, including loss of principal.

Risks specific to investing in the Quantified Tactical Sectors Fund include: Subadviser's Investment Strategy Risk, Active and Frequent Trading Risk, Aggressive Investment Techniques Risk, Counterparty Risk, Credit Risk, Derivatives Risk, Equity Securities Risk, Interest Rate Risk, Leverage Risk, Lower-Quality Debt Securities Risk, No History of Operations Risk, Non-Diversification Risk, Risks of Investing in Other Investment Companies (ETFs and mutual funds), Small- and Mid-Capitalization Companies Risk, Holding Cash Risk, Preferred Stock Risk, and Sector Risk.

Alpha measures the difference between an investment's expected returns based on its beta and its actual returns. A positive alpha indicates the investment has performed better than its beta would predict. A negative alpha indicates an investment has underperformed, given the investment's beta. Beta measures an investment's sensitivity to market movements. A beta greater than one indicates the investment is more volatile than the market. If beta is less than one, the investment is less risky than the market. Standard deviation measures the range of an investment's performance. The greater the standard deviation, the greater the investment's volatility. The Sharpe ratio indicates the reward per unit of risk by using standard deviation and excess return. The higher the Sharpe ratio, the better the investment's historical risk-adjusted performance.

Flexible Plan Investments, Ltd. serves as sub-adviser to the Quantified Funds, distributed by Ceros Financial Services, Inc. (Member FINRA/SIPC). Flexible Plan Investments, Ltd. and Ceros are not affiliated.

Advisors Preferred, LLC serves as investment adviser to the Quantified Funds. Advisors Preferred is a commonly held affiliate of Ceros. Gemini Fund Services is the transfer agent to the Funds and is not affiliated with the adviser, sub-adviser, or distributor.
